

MACH 3-5-7 Breakdown Plus - Valuable protection against machinery breakdown and production interruptions

An extended warranty usually provides cover for electrical or mechanical breakdown caused by failure of a machine component. However, it does not normally provide cover for accidental damage or breakdown caused by operator error or a power surge, short circuit, collision, theft or influx of foreign materials whilst in operation.

This is why you need MACH 3-5-7. MACH 3-5-7 is not an extended warranty but a carefully designed insurance policy for operators of industrial and commercial machinery to help plan for unforeseen mechanical breakdowns and production interruptions.

MACH 3-5-7 protects:

- Machine tools
- Printing machinery
- Electronic equipment
- Forklift trucks
- Production equipment
- Lasers and light sources for balance of life expectancy

MACH 3-5-7 provides cover for:

- Accidental damage and breakdown
- Unforeseen mechanical or electrical breakdown
- Operator error, power surge, short circuit and collision
- PCB failure, theft and influx of foreign materials

Flexible cover and fixed premiums

Businesses may choose up to seven years peace of mind with this flexible insurance cover. Once the level of cover is chosen, payment remains

fixed for the whole term and is guaranteed never to rise, regardless of the number of losses reported. MACH 3-5-7 therefore allows you to secure protection for your machinery much longer than conventional insurance policies or repair contracts.

Your choice of repairer

You can choose the quickest and most convenient repairer for you and your machinery, subject to policy limits. The ability for you to choose and instruct your own repairer means that the cost of downtime is kept to a minimum and you are in complete control of the repairs. You can even make the repair using your own qualified in-house engineers.

Additional cost of working

In the event of an insured loss, the policy will contribute up to £5000 towards outsourcing costs or overtime payments caused by the incident itself.

Efficient claims service

A telephone claims service reduces paperwork to ensure that when you submit a claim the machinery is up and running again as quickly as possible.

Claims falling outside of warranty do occur

Many people think they do not need cover in the first year because they have a warranty to cover breakdowns. Whilst it is true that you are more vulnerable to breakdown losses after the warranty expires, around 17% of all claims on new machinery occur in the first year as this graph illustrates.

New machinery - percentage of claims in each year.

Source: claims run-off database managed by Bluefin for 10,394 machines, purchased new

These are damage or operator error claims which would not be covered by the supplier's warranty.

Extended warranty has its limitations so choose MACH 3-5-7 Breakdown Plus.
